

HOCKEY – IT’S IN OUR DNA

TRAVELING EXHIBITION ON HOCKEY

Espace 400e

Quebec, Canada, 2011

Speed, precision, strategy! History, nostalgia, emotion! Here are a few ingredients which, gathered on an imaginary three-storey rink, will take you on an unprecedented journey.

Description

Divided into 14 zones, the exhibition Hockey – It’s in our DNA will immerse you in the world of hockey, experienced through both sight and sound. Music, speeches, descriptions, videos, décor — together, they will take you from hockey’s first tentative steps right up to today.

This project has been made possible thanks to the active participation of Remparts de Québec, in particular Jacques Tanguay and Claude Rousseau; and the collaboration of the Fondation Nordiques and its president Maître Marcel Aubut; as well as the NHL and the Montreal Canadiens hockey club.
